

ImmTrac. The best way to comply with Texas law.

House Bill 3054 mandates that all medical/ healthcare providers and third-party payers report to the Texas Immunization Registry (**ImmTrac**) all vaccines administered to any person younger than 18 years of age. (*Parental consent is required for the child to participate in the Registry.*)

Join a growing number of healthcare providers who are making **ImmTrac** one of the most successful programs in Texas.

Texas can greatly improve its disease prevention rates as more providers and parents participate. **ImmTrac's** advantages are many, and it's easy to access and use. If you do not have internet access, you can use **ImmTrac's Paper Reporting Form**.

TEXAS DEPARTMENT OF HEALTH

ImmTrac

is the **innovative**,
online system that **stores**
and **updates** immunization
information about **Texas**
children. The Texas
Department of Health
developed ImmTrac for you.

Nearly five million ImmTrac records — and counting.

Currently **ImmTrac** contains immunization records for almost five million Texas children under the age of 18. This important information comes from a variety of sources including private medical providers, public health clinics, Medicaid claims administrators, the Bureau of Vital Statistics and Women, Infants and Children (WIC) clinics. Regardless of the number of sources, each child's immunization information is consolidated into one record.

One-stop source for vaccine histories.

ImmTrac's a one-stop source for vaccine histories from multiple providers. It keeps track of when and what immunizations are coming up so you can send reminder notices to parents. This prevents the under- or over-immunization of children, which reduces unnecessary costs to families and third-party payers and eliminates needless discomfort for children.

ImmTrac can also help measure vaccine coverage rates in specific communities.

Parents value ImmTrac's privacy.

Parents appreciate knowing the status of their children's vaccinations, receiving reminders of immunization due dates and knowing that their records are protected. A child's information can only be entered into and released from the **ImmTrac** registry with the one-time written consent of the parent or guardian. Even then, only authorized users at authorized sites can access the child's information.

10 Great Reasons to Use ImmTrac

- 1 Free**
- 2 Easy to implement**
- 3 Fast, online access to all your participating patients' immunization histories**
- 4 Consolidation of patients' records from multiple providers**
- 5 Simplification of immunization record updating**
- 6 Simple way to comply with state law**
- 7 Generation of reminder/recall notices to parents**
- 8 Maintains secure confidential data**
- 9 Helps you manage the complex immunization schedule**
- 10 Offers cost-effective way to plan and track childhood disease prevention in your community**
